John Michael

Senior Front End Engineer

My career goal is to move into management as a CTO, and I know this role would help me hone my leadership skills.

About me

Highly capable, versatile and accomplished Senior IT Engineer with more than 8 years extensive management experience, planning and implementing. I have in-depth knowledge of Information Technology, Finance domain, Decentralized Finance and NFT Marketplaces and participated in Web-software development as Full Stack Engineer.

The important is that I'm always carefully analyzing the specifications, we always try to understand what the customer wants, what we want to achieve using the system, and the risks after the release, so that we can provide a system that is easy for users to use. In addition, when participating in a project, regardless of "employment form", look at the project from a bird's-eye view and fulfill your position and role, while at the same time following up the work and mentality of all team members.

Education

● Bachelor's Degree

From September 2008 to April 2012

[Information Science, Tokyo University](#) Tokyo, Japan
