📅 Date of birth 10/26/1990
📱 732 200 2588

Motivated and results-driven professional with over 8 years of experience in software development across various industries. Skilled in problem-solving, logical thinking, project structuring, and code management, I have consistently surpassed targets and delivered high-quality work. I am seeking a challenging role that will allow me to leverage my expertise and drive to contribute to the growth and success of a dynamic organization.

Education

Bachelor's Degree
From September 2008 to April 2012
Information Science, Tokyo University Tokyo, Japan

Department of Information Science, Faculty of Science

Work experience

Web3 Front End Engineer
From January 2022 to February 2023 Faculty Group Panama

- Demonstrated proficiency in building several pixel-perfect, responsive interfaces with React.js, delivering seamless user experiences across devices and screen sizes.
- Successfully integrated Web3 for wallet connections and contract integrations, ensuring multi-chain support, including Ethereum, Binance, and Polygon.

Full Stack Developer
From January 2021 to December 2021 LeadEdge Co., LTD Tokyo, Japan

- Designed and built an NFT marketplace that integrates with opensea.io using Next.js, delivering a user-friendly platform that provides a seamless user experience.
- Built a performance monitoring library for measuring front-end delivery and back-end service responses, improving overall application performance 40% and scalability.
- Created a collection-based Mint System(Lazy Mint for Zero gas fee) based on ERC721 and ERC-1155 NFT token contracts and uploaded it to IPFS, providing a reliable and efficient way of minting NFTs.

Full Stack Developer
From September 2018 to December 2020 ASUENE Co,. LTD Tokyo, Japan

- Successfully built a secure REST API with PHP/Laravel, enabling real-time access to millions of records and delivering seamless data management for users.
- Visualized complex data statistics with D3, providing users with an intuitive and easy-to-understand representation of key metrics and trends.

C#/C++ Developer
From April 2012 to August 2015 SilverStar Japan Co.,LTD Gifu, Japan

- Developed a robust C++ build system utilizing the Conan package manager and integrating with libraries such as HTSlib, minimap, and Boost, streamlining the development process and ensuring reliable builds.
- Created an automated email alert subscription service and profile management system, regularly sending thousands of customized messages per day, increasing user engagement and satisfaction.
- Implemented automated functional tests, load tests, and executive reports utilizing .NET tools, SQL Server Reporting Services, and Lua web API scripts, ensuring high-quality service delivery and performance.
